Victorian Power Industry

Power Industry Locks

Working with the Victorian Electricity Supply Industry (VESI) group, ASSA ABLOY has developed a master key system using Lockwood's latest keying technology MT5+. The master key system allows home owners to lock access to their power meter box while still allowing meter readers to gain access to the meter box with a key issued by a VESI group company. In order to maintain the highest level of key control the master key system is factory controlled and as such, you will need to place orders with ASSA ABLOY for fully assembled products. All new keys will come with a security card which has a unique 16 digit code, this code will be the authorisation credential for any additional keys on the same code.

High Security Padlock

334BPI2/119MT5+KA

These power industry locks are designed for high-security and high-corrosion applications for both commercial and residential uses.

Featuring

- High Security 334 Series brass case padlock with 8.7mm boron steel rapid change shackle with double ball locking. Standard padlocks with self-latching shackle, can be interchanged to deadlocking function
- Key alike group part number: 334BPI2/1195+KA
- Includes one MT5 key

\$161.01 *(including GST)*
